**St. Louis Park Plant - Pollution.**

I have your letter of October 7, 1970 informing me our attorney at St. Louis Park is concerned that we have not proceeded faster with the sewer installation.

We have not proceeded at all. The sewer is designed and we can proceed as soon as the City of St. Louis Park approves our plan, accepts our design, and allows us to connect to the manhole in Walker Street.

Delivery on the Edens Model 150 M separator is fourteen weeks. By the time the separator is delivered we could have the foundations ready to receive it and could have the sewer in place.

The next step is to obtain permission from the City of St. Louis Park to connect to the City sanitary sewer which Herb Finch is now trying to obtain.

Very truly yours,

*R. J. Hennessy*
